

NEW SRAM RED CHANGES EVERYTHING

New SRAM RED represents the pinnacle of Road racing technology and delivers countless Performance Advantages to the Professional and Enthusiast alike.

For 2012, the new SRAM RED continues in the SRAM tradition as the leader in **light weight, flawless shifting, and ergonomic advantage** with gorgeous aesthetic styling. How did we improve on the world's best mechanical gruppò? We started with everything we knew, and then designed a brand new drivetrain from scratch. Each part was engineered with the twin goals of eliminating the superfluous while focusing on an overall synergy that translates into unmatched performance. Elegant and simple, SRAM RED perfects the riding experience through genuine innovation. SRAM RED changes everything.

Commercial availability - **February 15th 2012.**
MSRP*: 2227 € / £ 1899.99 / \$ 2575

* Based on: RED Rear Derailleur Red Aero Glide, RED Front Derailleur RED Yaw Braze-on with Chain Spotter, GXP crankset (BB GXP included), RED cassette XG-1090 X-Dom, RED Shift/Brake Lever Set RED EgoDynamic and RED Brake Set Red Aero Link.

THE PERFORMANCE ADVANTAGE:

- > **6 BRAND NEW COMPONENTS:**
Shifters, Rear Derailleur, Front Derailleur, Brakeset, Crankset, Cassette
- > **NEW FRONT SHIFTING TECHNOLOGY:**
Fast / Efficient / Low noise
- > **FULLY INTEGRATED POWERMETER:**
New Quarq Technology
- > **AMAZING NEW FINISH:**
Two-tone Falcon Grey and Black look
- > **SRAM RED TOTAL WEIGHT:**
1739g (BB30). The lightest groupset ever.

The new SRAM RED ErgoDynamics™ Shifters represent our most advanced thinking yet on perfecting the interface between rider and bike. We have scrutinized everything, including the transition between handlebar and hoods, the grip texture,

finger wrap, and the separate interfaces with both the shifter and brake lever.

- **ErgoDynamic™ design: best in class control & comfort**
- **New reach adjustment to fit all hands**
- **DoubleTap® and ZeroLoss™ mechanisms for smooth and precise shifting**

The derailleur is designed with our Exact Actuation™ technology for precise, efficient shifting. We have paid rapt attention to the finer details, like adding a hollow titanium anchor bolt and even refining tooth geometry of the jockey wheel.

- **Exact Actuation™: fast and accurate shifting**
- **New AeroGlide™ jockey wheels for silent performance**
- **New cage and body design for improved cassette clearance**

Instead of simply moving back and forth, the derailleur cage actually rotates to maintain a consistent angular relationship with the chain. We call it Yaw™ Technology, and it eliminates the need for shifter trim.

- **Revolutionary Yaw™ Technology eliminates trim**
- **Fast and precise optimized shifting**
- **Refined materials for stiff and lightweight cage**

The new SRAM Red Powerdome X™ is the most advanced cassette ever made. It is super light, dead silent, and delivers an undeniable performance advantage. The eight cogs in the middle are machined from a single block of high grade tool steel, increasing stiffness while weighing even less

than a titanium cassette. Between each cog in the block is a StealthRing™ elastomer to reduce vibration and noise.

- **Super light 10 speed hollow steel dome construction**
- **StealthRing™ elastomers for silent ride**
- **Aluminum large cog and super durable finish**

The new SRAM Red Exogram™ Crankset is completely hollow all the way to the spider. Its hidden bolt pattern makes better use of carbon fiber to further improve stiffness and shed weight. The stunning X Glide™ chainrings are optimized for use

with the Yaw™ Technology in the front derailleur, delivering seamless, flawless performance.

- **Featherweight Exogram™ hollow carbon construction**
- **X Glide R™ chainrings: advanced shifting technology**
- **Hidden bolt for increased strength and stiffness**

The new SRAM Red Brakeset has been created with a host of wind-cheating features to make the brake body more aerodynamic. The new patented AeroLink™ arm reduces frontal area while improving

braking performance and modulation.

- **AeroLink™ arm: improved modulation and high power**
- **Sleek profile and aero barrel adjuster**
- **Aero indexed 4-position quick release**

A lighter, more accurate power meter completely integrated with the philosophy and performance of SRAM RED. The sleek new geometry reduces system weight and delivers clearance for oversized frames and aerodynamic chainrings. Integrated electronics minimize interconnections and reduce

exposure to the elements, bringing unmatched durability and reliability.

- **Lightweight and +/- 1.5% accuracy**
- **Integrated electronics = maximum reliability**
- **Ease-of-use: Visible ID, LED indicator, replaceable battery**
